SUPERMOTO RACING FLOATING FLAME

The RACING Flame rotor is the ultimate in stopping power. Made of hardened Chrome Molybdenium alloy with anodized aluminum inner support and 10 riveted stainless floaters. Allows the use of the stock master cylinder. Match with our racing compound brake pads for optimal results.

Withstands temperatures up to 1000°F without any fading.

THICKNESS: 4mm
WEIGHT: 1160gr

320 MM

SUPERMOTO STREET FLOATING FLAME

The STREET Flame disc - a floating front rotor with 10 riveted stainless floaters - is an ideal solution for street riding with outstanding stopping power. Use your stock brake caliper with our CNC machined and anodized aluminium billet adapter bracket to relocate the caliper. Match with our racing compound brake pads for optimal results. Not compatible with our 4-piston caliper.

Vents are designed for efficient cooling & rotor cleaning.

THICKNESS: 4mm
WEIGHT: 970gr

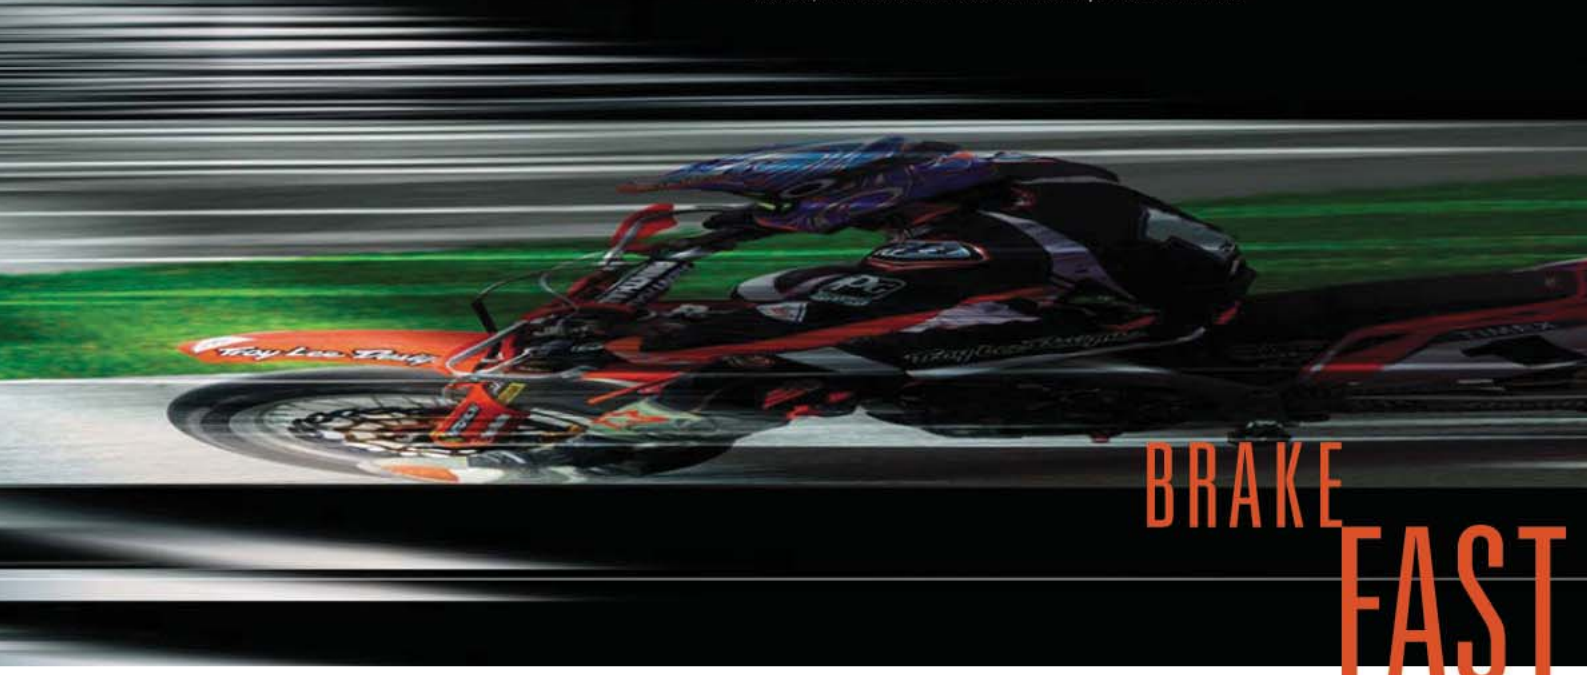

320 MM

SUPERMOTO ECO FIXED FLAME

The ECO rotor has been designed as an economical solution for recreational fun riding without concession on stopping power. Transforming your bike from dirt to street and back has never been easier. Use your OEM brake-caliper with the help of our aluminium adapter bracket. Match with our racing compound brake pads for optimal results. Not compatible with our 4-piston caliper.

Laser-cut, CNC drilled & surface machined for perfect fit & flatness.
